PRINTING GUIDE / 印刷說明

01 Choose your file

Individual A6 PDFs: one front and one blank message back.

Reference pack: all ten designs, 20 pages, front/back pairs.

02 Professional print

A6 trim: 105 x 148 mm. Bleed: 3 mm on every side.

PDF media: 119 x 162 mm, including crop marks.

Ask your printer to honour the embedded TrimBox and BleedBox.

03 A4 duplex at home

Select A4, actual size / 100%. Disable fit-to-page and scaling.

Duplex: flip on the long edge. Print pages 1-2 as a test first.

The two cards sit sideways. Backs compensate for long-edge flip.

04 Check before a batch

Hold the test sheet against light to check front/back alignment.

If your printer feeds differently, adjust duplex settings and retest.

Allow ink to dry, then cut at crop marks. Use suitable card stock.

05 Masters and personal messages

These public files are blank-message masters, version 1.

Write by hand or use the private order print workflow.

Never upload personal messages into this public asset folder.

Colour is RGB; ask your printer for a paper and colour proof.
